Pre-School

Early Years Foundation: Shaping Bright Futures

At **Quality Education System (QES)**, we believe the early years are the most critical building blocks for a child's future. We have developed a robust academic program that aligns with national standards, ensuring that children aged 3–5 years thrive in a stimulating, secure, and faith-integrated environment.

Our approach fosters confidence, curiosity, and a love for learning, preparing your child for the challenges and opportunities of tomorrow.

Our Approach to Learning & Development

We believe in a child-centered philosophy where learning is a joyful discovery.

- **A Unique Child (Empowerment):** We view our role as facilitators, guiding children toward becoming independent, lifelong learners.
- **Positive Relationships:** Our dedicated teachers work in close partnership with parents to create a nurturing environment where every child feels supported and encouraged to reach their full potential.
- **Enabling Environments:** We respect the innate potential of every student. Our classrooms and outdoor spaces are designed to encourage child-initiated learning, allowing children the freedom to explore, imagine, and grow.

A Dynamic Learning Experience

At QES, we go beyond traditional methods, using a blend of activities tailored to a child’s natural curiosity.

- **Guided Play:** Children explore indoor and outdoor activities based on their interests. Our teachers build upon these moments to introduce foundational academic skills.
- **Circle Time:** A vital routine for building confidence, self-esteem, and social skills through group interaction and communication.
- **Story Time:** We bring literature to life, using stories to expand vocabulary, spark imagination, and foster a lifelong love for reading.
- **Creative Expression:** Through play, art, music, and drama, we provide outlets for self-expression and creativity.
- **Library Resources:** Our collection includes a variety of tales, picture books, and interactive resources that help turn learning into an adventure.

Core Values & Character Building

We believe that education is incomplete without a strong moral compass. Our curriculum is deeply rooted in **Quranic values**, which act as the guiding principles for our students' daily lives, ensuring they grow into compassionate, ethical, and responsible individuals.

Areas of Learning and Development

We focus on the "whole child," balancing social development with essential academic skills. We introduce the foundations of **Science, Mathematics, and Technology** through practical application and interactive play.

Prime Areas

These are fundamental to a child's growth throughout the early years.

- **Personal, Social, and Emotional Development:** Building character and emotional intelligence.
- **Physical Development:** Enhancing motor skills through active play.
- **Communication & Language:** Developing the ability to listen, speak, and understand.

Specific Areas

- **Mathematics:** Introducing logic, numbers, and problem-solving.
- **Literacy:** Building reading and writing foundations.
- **Understanding the World:** Exploring the environment and the community.
- **Expressive Arts & Design:** Encouraging creativity through varied media.
